Special Notice for Students

COVID – 19 - VACCINATION

Considering the prevailing situation in the country and the increasing threat of COVID virus, the COVID Prevention Committee of the South Eastern University of Sri Lanka strongly recommends that you get vaccinated at the nearest vaccination Centre in your area as an accelerated COVID-19 Vaccination Programme is being carried out throughout the country.

All vaccines are effective and recommended by the World Health Organization, as well as prevent severe disease and further transmission of the virus.

You might be required to show your South Eastern University Student identity card at the vaccination Centre.

“If you protect yourself, you protect others including your loved ones”
