

Dear students of South Eastern University of Sri Lanka

We are going through an unprecedented pandemic of COVID19 in Sri Lanka and we learn that things are brought under control due to concerted efforts taken by the government in consultation with health authorities. At this critical juncture, you need to stay at home following the instructions of the health authorities and the government to ensure your, your family's and the society's safety.

We are mindful of your health and care. Therefore, if you face any difficulties in terms of your health at this critical juncture, we urge you to inform us so that we may focus on the possibility of extending our assistance towards you, in all possible means.

In the meantime, your academic journey has now come to an abrupt halt due to suspension of academic activities of all universities. To remedy the persisting situation, the University has taken some measures to upload learning materials of courses in the Virtual Learning Environment (VLE) or Learning Management System (LMS) in the website of the University (<http://vle.seu.ac.lk/>). Therefore, we appeal you to take advantage of materials available in the VLE.

Vice Chancellor, Deans and Academics of SEUSL
