SCHEDULE OF SUBMISSION

Recruitment of Full Stack Freelance Developer (FSFD) for the Research Project AI-Enabled Systems and Methods for Retail Sector

The research team has identified the following tasks for the FSFD. Quote the amount for each task. Please note that the principal investigator holds the final right to accept the software code or request a reimplementaion of the same function due to the research nature. Therefore, a flexible arrangement such as an hourly or daily rate may be mutually beneficial.

| Task | Amount (LKR) | Comments (If any) |
|---|--------------|-------------------|
| Meetings for the understanding of problem and requirement gathering. The research team already has a partial completed mobile application and workflow engine based backend. | | |
| Test the application for different versions of android devices and fix any compatibility issues | | |
| Implement account payable and receivable in the existing mobile application | | |
| Implement lookup feature for human in the loop OCR processing using workflow engine. The lookup feature need to be implemented in desktop or web form which automatically suggest possible data values to human proof reader | | |
| Integrate the lookup feature with AI based APIs provided by the research team. | | |

| | | |
|--|--|--|
| | | |
